■ All applications are due by
Sunday, April 25th.

■ Orientation in Baltimore and
Washington D.C. for all accepted
participants. Dates TBA

Please contact Rebecca Lamb at
rlamb@need.org with any questions.

**Come participate in a free program designed for young women
interested in STEM!**

The Exelon STEM Leadership Academy is a week-long, residential leadership program at University of Maryland where young women learn about the energy industry in fun and interactive ways, including field trips, hands on activities, small group discussions with women leaders from across the region, leadership development training, and an energy challenge with some great prizes for winning projects! Each participant will receive an iPad to use for Academy activities and to take home at the end of the week.

"I enjoyed meeting other girls that are interested in STEM and leadership. I really felt at home and everyone was just amazing."

"I loved this and I am so grateful to have been given this opportunity to meet such wonderful and powerful people."

Who should apply?

Young women currently in 10th or 11th grade.

We are closely monitoring the Covid-19 public health situation. The 2021 Academy is being planned as an in person, on campus event but may be converted to a virtual event based on local health recommendations and requirements.

STEM
innovation + leadership academy

in partnership with

Exelon Foundation.
